

# Multipurpose Thresher

## Передвижной аппарат для вторичной обработки семян

It is operated by a Pulley- belt system or by a shaft. It works out wee, barley, oats, rye, and the likes productively and fast. With an additional apparatus, you can also harvest lentil, chickpea, bean, and similar kinds of crops too. Demanded type of straw for stock breeding can be gotten by changing the sieves. Crops are cleaned in two shaking systems. Its sacking system makes it comfortable to the user to put the crops into a sack or to deliver them to a trailer pulled at the back. It brings an easy way of use by the front mounted adjustable drawbar and fixed drawbar at the back.

Предназначен для обработки собранного урожая. Перерабатывает собранные культуры отделяет зёрна и измельчает оставшиеся сено в зависимости от потребности.

MODEL	Модель			AGMT
Total Length (B)	длина (B)	cm		390
Total Width (A)	ширина (A)	cm		238
Total Height (C)	высота (C)	cm		226
Diameter Of Bator	диаметр батора	cm		120x85
Bator Sieve	решето батора	cm		119x125
Size Of Wheel	габариты колеса	cm		16x600
Required Power	мощность	hp	лс	35-90
Total Weight	масса	kg	кг	1460
